

NHS Grampian Strategy 2022-2028

Engagement Pack - Stage 1 (June – August 2021)

NHS Grampian is starting to rebuild our healthcare services after a challenging time during COVID-19. We are calling this our **plan for the future**.

We want to create this plan with you – not for you – and to do that we need to know what matters to you.

Challenges

COVID-19 has forced us to change a lot of our services

We need to look after a growing population with fewer staff

More people are living with diseases and long-term conditions than before

Our population is getting older and more people are needing care in the last few years of their life

There are huge differences in health between different groups in our society

Opportunities

There are ways to use technology to improve our services and help more people get the care they need

We need to work closely with other groups to help everyone get the support they need in all aspects of their health

Some changes from COVID-19 have been good and we need to build on those to make sure our services continue to improve

It's important to focus on keeping people healthy for longer and helping people look after their health on their own

Get Involved

COVID-19 has stretched us all to the limit but it has also shown us how **we can all work together when we have the same goal**.

We need your help! We need to know what's important for your health and wellbeing. Use the QR codes to **take the survey or go to the website** and get more information.
